Civil engineer

PESCA Environnement is a dynamic fast-growing company that provides multidisciplinary environmental services. We are looking for a **civil engineer** who would like to work for the promotion of projects in this field.

You will design and carry out a variety of undertakings under the oversight of the head of our engineering department. Your particular skills will serve to prepare drawings and specifications, and to estimate and supervise projects of an environmental nature. You will participate in carrying out mandates linked to renewable, hydraulic and wind energies as well as industrial, municipal and residential projects.

You will work in the following areas of activity:

- Erosion control and shoreline stabilisation
- Engineering related to the construction of wind farms
- Municipal engineering (wastewater, waterworks, transportation)
- Environmental engineering

We are looking for someone who:

- Maintains good relationships with clients
- Loves varied tasks
- Is organized

We are seeking the following profile:

- Bachelor's degree in civil engineering or the equivalent
- Member of the Ordre des Ingénieurs du Québec
- Three years of pertinent experience
- Mastery of Autocad software
- Mandatory bilingualism (French and English)
- Knowledge of consulting engineering (an asset)

You will hold
a **permanent, full-time position**
with **competitive advantages**
